Application/Installation

ZeoFiber—Natural, Safe, Biodegradable

ZeoFiber is a blend of natural cellulose fibers that replaces the diatomaceous earth (D.E.) and is widely used as a filter aid in sand cartridge filters.

One Pound of ZeoFiber Replaces Eight Pounds of D.E.

Open ZeoFiber is an all-natural, biodegradable and environmentally safe alternative to D.E. for use in all pools and spas.

ZeoFiber is 100% pure cellulose fiber that filters better than D.E. (down to 2-4 microns) and gives your water a clearer, more polished look.

ZeoFiber Installation and Usage

D.E. Filter Conversion

1. Open and thoroughly clean filter (grids and can) of all existing media and debris. Make any repairs necessary and reassemble filter.
2. With filter cleaned and pump running, slowly broadcast ZeoFiber onto the water in your skimmer. (Pre-mixing with water is not necessary.)
3. When backwashing* is necessary, simply follow your manufacturers instructions and recharge your pool following Step 2 (above).

*After conversion to ZeoFiber your filter may require additional backwashing and recharging until stabilized, due to the higher filtration rate.

New D.E. Filter Installation

1. With filter running, slowly broadcast ZeoFiber onto the water in your skimmer. (Pre-mixing with water is not necessary.)

Cartridge and Sand

ZeoFiber acts as a filter aid in both cartridge and sand filters.

1. With filter running, simply add ZeoFiber to the water in your skimmer one cup at a time until the filter gauge shows a one-pound increase in pressure.
2. Your filter may require backwashing or cartridge cleaning due to the finer filtration rate with ZeoFiber.

ZeoFiber traps smaller particles, resulting in cleaner, clearer water.

[FAQs and Tips](#) ⇌

ZeoFiber Benefits

- Superior Water Clarity
- Natural and Environmentally Safe
- 100% Pure Cellulose Fiber is Biodegradable
- Finer Filtration
- Longer Filter Cycles
- Easy to Use
- Economical

[See Benefits](#) ⇌

ZeoFiber's natural cellulose fibers are non-toxic, safe and biodegradable.

ZeoFiber Application

Use the following chart to determine the correct quantity of ZeoFiber for your filter size.

Filter Size (sq. ft.)	ZeoFiber (cups)	ZeoFiber (ounces)
24	6	9
36	9	14
48	12	18
60	15	23
72	18	27
