# ZeoFiber

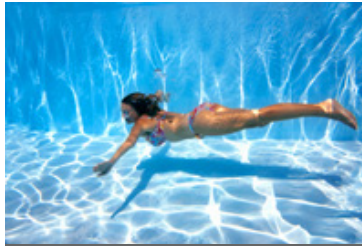

## ZeoFiber—Natural Alternative to D.E.

**ZeoFiber is completely non-toxic and biodegradable. The cellulose fiber used in ZeoFiber is even approved by the FDA as a food additive.**

### ZeoFiber is Environmentally Safe

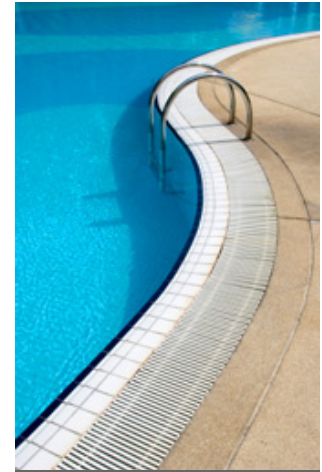

ZeoFiber is a pure white cellulose fiber produced from wood fiber. ZeoFiber is a renewable resource that is a 100% biodegradable "GREEN" filtration media. ZeoFiber is a perfect replacement for diatomaceous earth (D.E.). For pool owners with sand and cartridge filters, the addition of ZeoFiber will give your pool water a more polished look and will remove oils not ordinarily filtered out by other filter media.

The cellulose fibers of ZeoFiber trap smaller particles, resulting in cleaner, clearer water.

### Use ZeoFiber for Filtration In:

- Private Swimming Pools
- Commercial Swimming Pools
- Sand and Cartridge Filters as a Filter Aid
- NSF/ANSI-50 Approved for use in all D.E. Filters

ZeoFiber's 100% cellulose fiber is natural, safe and biodegradable.
