- Fish

ADDED  
PROFITS

Within the United States and many other countries, Zar-Min<sup>®</sup> has been proven effective in academic testing, field trials, and feed industry research. Zar-Min<sup>®</sup> is widely used to improve feed production economics for beef, dairy cattle, horses, sheep, broilers, commercial egg layers, turkeys, swine, rabbits and fish.

This product is for use as a flowing agent or an anti-caking agent in an amount not to exceed 2% of the finished feed.
